IMTF and ERI

HYPERSUITE/5 🔒 - Secure Document Management for OLYMPIC Banking System

IMTF

IMTF (Informatique-MTF SA) is an international Swiss based software company. IMTF offers a comprehensive portfolio of solutions in the fields of Enterprise Content Management (ECM), Compliance and Risk Management. Expertise gained from more than 25 years and a clear focus on the Financial Services industry, enable your business to better achieve sustained added value.

IMTF operates worldwide and serves clients in over 50 countries through a network of offices and partners. Over 100 experts globally constitute a competent network and solid expertise, which makes IMTF unique in its ability to offer top-class solutions.
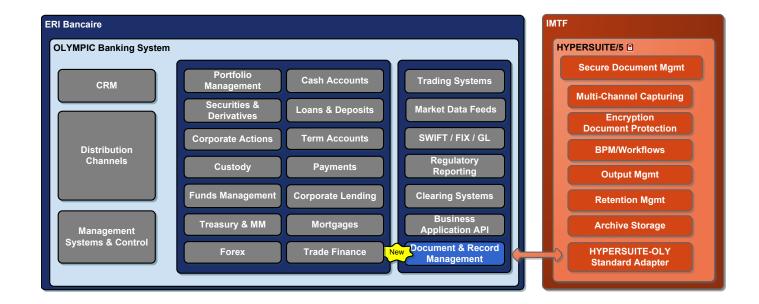

HYPERSUITE/5 🔒

HYPERSUITE/5 is a modular and highly secure Document Management solution. HYPERSUITE/5 captures, manages and archives the entire spectrum of structured and non-structured information available in your organization, from scanned documents, e-mails, MS-Office documents, output from core systems such as ERP or Core Banking Systems, and many other record types.

ERI

ERI is an international company, specialising in the design, development, implementation and support of an integrated, real time banking software package: OLYMPIC Banking System. With more than 500 highly qualified staff, ERI is present in many cities such as Geneva, London, Lugano, Luxembourg, Paris, Singapore and Zurich.

ERI is the market leader in the provision of banking and asset management software in Luxembourg, Monaco and Switzerland. The OLYMPIC Banking System has been chosen by over 300 banks and financial institutions spread over more than 50 countries across Europe, Asia, Middle-East, Africa and U.S.A.

OLYMPIC Banking System

The OLYMPIC Banking System is a fully-integrated, real-time, front-to-back banking solution. Based around a core system which groups all centralized functions, OLYMPIC Banking System offers a wide choice of fully integrated optional modules. Browser based and Client centric, the OLYMPIC Banking System has been designed on the latest technology standards: Service Oriented Architecture (SOA), N-tier architecture, database independent and available on various operating systems.

HYPERSUITE/5 🔒 for OLYMPIC Banking System - Secure Document Management

HYPERSUITE/5 provides control, access, processing and sharing of all your enterprise content in a secure and regulatory compliant way. HYPERSUITE/5 for OLYMPIC Banking System addresses your business and IT requirements for Document Management coherently with your Core Banking Solution: it allows you to capture, manage, retrieve and archive structured and unstructured information from anywhere in your organisation. Choosing a solution which is designed to work with the current and future versions of OLYMPIC Banking System is the best way to protect your investment while providing an integrated, efficient and cost-effective solution to your organisation and its users.

Key component of your solution

HYPERSUITE/5 for OLYMPIC Banking System implements the vision of tightly integrated coherent systems which streamlines business processes and provides the highest level of compliance and security for a competitive Total Cost of Ownership (TCO) . Not just another Electronic Content Management (ECM) system, it is an important component of your complete Integrated Banking Solution – in a class of its own.

Customer-Centric

Unproductive heterogeneous IT solutions combined with complex integration which forces users to use multiple applications to carry out single tasks are still a reality. It is time to change this! This is why we have created HYPERSUITE/5 for OLYMPIC Banking System.

HYPERSUITE/5 for OLYMPIC Banking System is a modular, secure and tightly integrated banking platform offering unmatched simplicity. The smart and open architecture of OLYMPIC Banking System allows its functionality to be extended by the comprehensive Document and Record Management features of HYPERSUITE/5. A complete, 360 degree view of a customer file including all documents is now possible with transparent and consistent access rights from the OLYMPIC Banking System web user interface. As a user this is the simplicity you are looking for!

Tightly Integrated

ERI and IMTF experts have developed together connectors to integrate both systems. Unlike other solutions, HYPERSUITE/5 comes as out-of-the-box and preconfigured for OLYMPIC Banking System. Numerous advantages include:

- Centralized User Management including Single Sign On to every element of the overall solution
- CRM data is transparently and securely shared between Core Banking and ECM Systems
- Built-in-support for Structured Information Capturing of content provided from the OLYMPIC Banking System.

All this facilitates implementation and contributes to reduce the TCO.

Secure and Robust

Security breaches can have a significant adverse impact on a bank's business and non-compliance to legal archiving and record keeping regulations may result in fines and reputational damage. Loss of information and/or duplication of records can lead to a reduction of productivity and profitability. HYPERSUITE/5 guarantees that documents are proactively protected and securely managed in your organisation.

Future proven Solution

HYPERSUITE/5 is the only Secure Document Management Platform promoted by ERI to work with the OLYMPIC Banking System.

Choosing a solution working with the current and future versions of the OLYMPIC Banking System is the best way to protect your investment.
