December 2009

### **ERI announces validation of OLYMPIC Banking System® on IBM POWER System p AIX servers.**

PARIS / Noisy-le-Grand, 25th November 2009: ERI enjoyed the use of the IBM INNOVATION CENTER in the Paris region in order to validate its OLYMPIC Banking System® for UNIX solution.

Thanks to the facilities made available by IBM, ERI was able to prove the compatibility of its OLYMPIC Banking System® software with the IBM AIX operating system.

This validation features as part of the overall project to port OLYMPIC Banking System® onto open platforms (UNIX, Linux, Windows) and also to support multiple databases (IBM DB2, ORACLE, SQL Server, MySQL).

Technical and functional validation of the application was conducted using the IBM Rational Performance Tester toolset. Load testing enabled the behaviour of the OLYMPIC Banking System® functionalities to be tested on the latest IBM POWER System p systems based on Power6 processors.

With this announcement, ERI is broadening its potential client base both in its traditional Private Banking segment and in its penetration of Wealth Management and Universal banking.
